OUR COMPANY

The Australian Brushware Corporation (ABC) is a leading wholesaler and distributor of quality paint brushes and paint accessories in Australia. We supply to major paint specialists and hardware stores.

Our brand Monarch is renowned for its handcrafted paint brushes and continues to drive the evolution and development of the Australian paint accessory market. Whether you are a professional trade painter or DIYer, Monarch will have the right painting tool for your next painting project.

Our brush products have helped to genuinely revolutionise the move from natural bristle, to a combination of more environmentally sustainable blends, through to synthetic, high-performance brushes.

Under our premium brands (Monarch and Monarch Advance) we are able to offer our consumers a one-stop shop for all their painting accessory needs.

Our comprehensive customer service and sales team, with warehouses throughout Australasia, allows us to deliver industry-leading customer service and support to our customers and consumers.

2020

ABC was awarded a Good Design Award from Good Design Australia for the Monarch Mini Fill Sand Go Multipurpose Filler.

2017

ABC celebrates its 20th anniversary.

2016

Monarch branded products are launched into the UK and IRE markets.

Monarch launches new products in the paint preparation category.

2015

Monarch releases its new innovative compact size Mini Caulking Gun. ABC was awarded a Good Design Selection Award from Good Design Australia for the Monarch Mini compact caulking gun & mini cartridge.

2014

The Monarch Mini compact range of silicones and adhesives is launched into the sealant market.

ABC successfully acquired the distributorship of Shur-Line Painting Products from the US and is now the exclusive distributor in Australia.

2008

The Monarch Detail and Finishing range of paint brushes are successfully introduced into the market.

2005

Monarch expands its business into other paint accessory categories including roller covers, trays, buckets, poles, drop sheets and kits.

2000

ABC contributes to the evolution from pure bristle paint brushes to synthetic brushes with its release of the Monarch Advance premium paint brush.

1997

ABC was established along with the Monarch brand.

New offices and warehouse in Victoria (Campbellfield) are built.

Paint Brush DNA

HANDLE

A **raw timber handle** will absorb moisture when used which will cause the natural grain of the wood to raise. This **provides a natural grip** and reduces cramps. Coated or plastic handles prevent moisture from being absorbed, making them difficult to grip for long painting sessions.

FERRULE

High quality pins and ferrules are made from **stainless steel** to prevent rust and **increase durability**. **Premium epoxy resin** is used to bond the filament to the ferrule. **Timber wedges** are inserted to support the filament and enable the brush to maintain its shape. A brush that holds its shape provides an **accurate painting result**. Monarch Advance ferrules have an **aluminium insert** embedded in **epoxy resin** to guarantee **no filament loss**.

FILAMENT

Pure Bristle is a natural fibre ideal for use with oil/enamel based paints.
Synthetic filament is ideal for use with both oil and water based paints.
Blended filament combines the benefits of natural and synthetic filament for unique applications

Paint Brush Quality

VALUE PRICED

- Disposable
- Low cost
- Holds less paint with less coverage
- Filament loss

BEST QUALITY

- Smoother, even paint release
- Holds more paint for greater coverage
- Durable
- Provides a professional finish

Paint Brush Types

PAINT BRUSH

Standard shaped handle with thicker ferrule to hold more paint than any other brush type. Ideal for painting walls, doors, furniture & broad areas.

WALL BRUSH

Slightly thinner than a standard paint brush to be lighter and easier to use. Ideal for painting walls, doors, furniture & broad areas.

SASH CUTTER

Longer handle allows for greater flexibility and control of the brush. Ideal for edging windows, door frames & corners.

ANGLE CUTTER

The long handle gives greater flexibility and control while the angled filament allows for easier cutting in. Ideal for edging windows, door frames & internal corners.

MINI ANGLE CUTTER

Short handles allows for more control in tight areas while the angled filament allows for easier cutting in. Ideal for edging windows, door frames, skirting and moulding.

RAT TAIL

A long thin handle with a pointed tip to allow for greater flexibility, control of brush and easy handling. Ideal for edging windows, door frames & corners.

OVAL BRUSH

Similar to the standard paint brush with an oval ferrule meant to hold more paint. Ideal for painting walls, doors, furniture & broad areas.

OVAL CUTTER

Longer handle allows for greater flexibility and control of brush while the oval shape holds more paint. Ideal for edging windows, door frames & corners.

For the Royal Finish

• SINCE 1997 •

Australia's favourite trade painter's brush containing advanced synthetic filament and the highest quality materials and craftsmanship to provide maximum coverage, durability, control and a royal finish every time.

Roller Cover DNA

NAP

Roller covers come in different nap or fabric heights to suit different applications and paint types. The nap length and material will determine how much paint is held in the roller and how the paint is released. Choose the right nap length based on your project below.

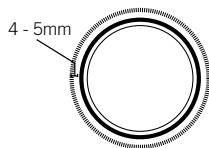

CORE

A good quality core will ensure a strong hold on the roller frame and material, as well as be able to hold it's shape when in use for a smooth paint finish. Monarch roller covers come with a PP core, except for the seamless foam in our trade range which have a phenolic core.

LENGTH

Roller length varies and should be matched to the scope of the painting project. The standard lengths are 230mm or 270mm but non-standard lengths are easily available.

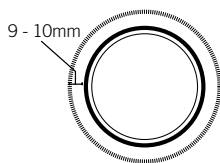

Nap Length Guide

4 - 5mm NAP

IDEAL PAINT TYPES: **Gloss/Semi-Gloss Paint**

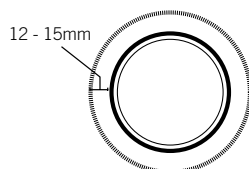

PAINTING PROJECTS:
Doors, Cupboards, Benchtops, Smooth Surfaces

9 - 10mm NAP

IDEAL PAINT TYPES: **Low Sheen/Semi-Gloss Paint**

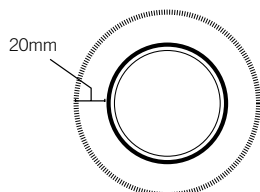

PAINTING PROJECTS:
Interior Walls, Laundry's, Bathrooms, MDF, Timber, Ply Wood

12 - 15mm NAP

IDEAL PAINT TYPES: **Flat/Low Sheen Paint**

PAINTING PROJECTS:
Ceilings, Plaster, Textured Walls, Wallpaper, Eaves, Cement Sheeting

20mm NAP

IDEAL PAINT TYPES: **Flat/Low Sheen Paint**

PAINTING PROJECTS:
Brick, Render, Concrete Floors, Driveways, Paths, Masonry

Roller Cover Materials

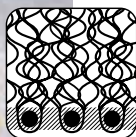

MICROFIBRE

A very popular shed resistant (lint free) roller cover fabric made of elastic and resilient fibres. A superior microfibre quality with fantastic paint pick-up and release providing the ultimate super smooth finish. Most suitable for water-based paints.

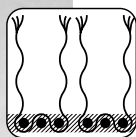

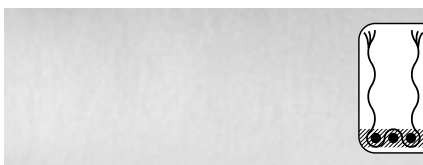

SEAMLESS FOAM

Seamless foam roller covers have a short nap length to deliver the best results when used for gloss and semi-gloss finishes. Being 'seamless' ensures there are no roller marks. Most suitable for oil-based paints.

FABRIC (KNITTED FABRIC)

Knitted fabric (commonly referred to as 'fabric' or simply 'polyester') is mostly used when project speed and coverage are important. Most fabrics have a great paint pick up and release which ensures fast wash out and cleaning.

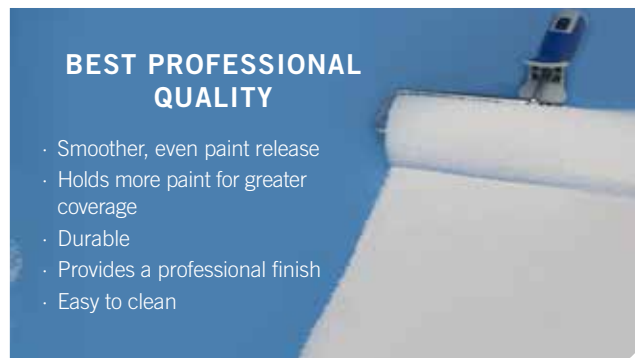

WOVEN POLYESTER (WOVEN FABRIC)

Woven fabric (commonly 'woven polyester') is created with a double 'woven' fibre attachment that makes it very durable and able to provide a better finish. Like knitted fabric, woven polyester is used when project speed and coverage are important with great paint pick up and release.

Finishing Processes

Our roller covers go through a rigorous finishing process during manufacturing. This includes fluffing up fibres, trimming of excess fabric, bevelling the roller cover ends and vacuuming loose fibres. The thoroughness of the finishing process ensures the high quality of our roller covers and their superior performance.

Drop Sheet DNA

CANVAS DROP SHEET WITH RUBBER BACKING

Heavy duty canvas with rubber backing provides durable, non-slip, leak-proof protection that grips the floor. Ideal for wooden floors & tiles and suitable for furniture & carpets

CANVAS DROP SHEET WITH PLASTIC BACKING

Heavy duty canvas with plastic backing provides durable, leak-proof protection for furniture, floors, carpet & tiles. These drop sheets have double-sided hemming and are 100% leak-proof protection for your painting project.

CANVAS DROP SHEET

Heavy duty and durable interior protection for furniture, floors, carpet & tiles. The professional quality canvas has double sided hemming and will provide good protection against paint spatter.

HEAVY DUTY PLASTIC SHEET

Interior and exterior protection for furniture, floors, carpet, tiles and windows. Heavy duty plastic will resist tears and comes with an embossed safety grip pattern to reduce slippage. 100% leak-proof.

LIGHTWEIGHT PLASTIC SHEET

Disposable interior and exterior protection for furniture, floors, carpet, tiles and windows. Clear light weight plastic. Water proof.

Standard Drop Sheet Sizes
